

Computer Rooms

FREEAXEZ USA™ – A new paradigm for raised access flooring

The FreeAxez low profile, all steel, access floor is an excellent choice for wire management in computer rooms:

The innovative, revolutionary design incorporates:

- **High Strength All Steel** - high load-bearing, long-lasting.
- **Ease of Installation** - 1000 square feet per day per installer.
- **Simplicity of Use** - 5-second access to power, voice and data cabling.
- **Lowest Profile** - of any raised floor available (1.6", 2.75").
- **High Capacity** - 90 CAT cables at 40% capacity per channel every 15 inches.
- **Organized Raceways** - grid system assures ordered cable configuration.
- **Sustainable Design** - the first low profile system listed in GreenSpec.

Make the most of your space with FreeAxez! Realize advantages in flexibility, aesthetics, ease-of-access, organization, sound quality, and sustainability. FreeAxez saves bottom line dollars, and will pay for itself time and again as your space needs change and grow!

Exceptional strength and load-bearing for heavy IT equipment

The high load-bearing, all-steel FreeAxez floor is equipped to handle heavy static and rolling loads. The floor can be reinforced with standard components to increase load-bearing capability.

FreeAxez has more than enough cable capacity for server rooms!

The FreeAxez floor provides organized channel raceways 5" wide, 2 1/2" tall every 15 inches, which is more than enough room to contain the cabling and other conduits needed to support the application. Organized raceways in a grid system promote excellent wire management.

FreeAxez is a superior alternative to the traditional raised floor.

The 50 year design, consisting of 2' x 2' panels supported by 4 posts, is less flexible and less functional. The cable zone under the floor easily becomes unruly and unmanageable. Acoustics are poor, and footfall echoes off the subfloor. Panels weigh as much as 50lbs each, requiring speciality training to access the floor for cable changes – a labor-intensive task to lift several panels over the wiring path. Expensive sprinkler and smoke detection systems are often required.

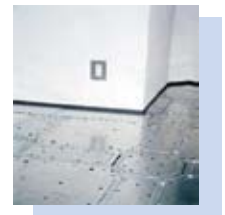

FreeAxez saves valuable space for ramps, headroom... no handrails required!

The low profile of the FreeAxez flooring system will save valuable vertical space. Nobody wants or likes low ceilings – it makes the space feel small and cramped. The FreeAxez system is the lowest available in the world... saving on ramp space and eliminates the need for costly handrails.

Changes to wiring and outlets are quick, easy and inexpensive “5-second, no-tool easy access.”

To add equipment and wires, simply remove the floor tile and lift the channel plates along the wiring path; new wires are installed in seconds instead of hours!

With quick-connect floor boxes, outlets for computers and power can be relocated in seconds.

FreeAxez has no equal for the fit-out of existing space

Columns

Round Rooms

The gravity-held quick connect components are rapidly installed without any glues, screws or fasteners. Open areas are installed at 1000 SF per installer per day. The border components fill the gaps quickly without having to cut any metal. FreeAxez provides efficient fit-out of irregular areas, including round rooms, curved walls, angled walls, columns, transitions, door jams, and vents.

FreeAxez - every computer room deserves this floor!

Top organizations like **Massachusetts Institute of Technology (M.I.T.), Johnson & Johnson, Sotheby's, North American Electric Reliability Corporation (NERC), Harbor Technologies, DialAmerica, Siemens, Northrop Grumman, Lockheed Martin, and all branches of the US Military** (to name a few!) have installed FreeAxez in varied and critical applications.

FreeAxez has quality representatives in your area who are available to demonstrate the FreeAxez flooring system at your facility. Feel free to contact FreeAxez at 888-747-8515 to discuss how we might assist your organization in joining the growing family of clients who have made FreeAxez their wire management solution.
