

Gridd is an ideal adaptive cabling distribution system for casinos

Gridd's innovative and revolutionary design incorporates:

- **Lowest Profile** - of any raised access floor available (1.6" or 2.75").
- **High Capacity** - Large cable capacity with organized channels for cable runs.
- **All Steel** - High durability and strength. Double 16 gauge zinc galvanized steel.
- **Efficient Installation** - 1000 square feet per installer per day.
- **Simplicity of Use** - No tools required for access to power, voice and data cabling.
- **Immediate ROI** - Instant payback realized during turnover and re-configurations.
- **Sustainable Design** - GreenSpec listed; 100% recyclable, reusable, refundable.
- **Addition by Subtraction** - Eliminate power poles and exposed cabling.
- **Rapid Depreciation** - as equipment.

Gridd is the 21st century wire management solution for gaming facilities

In casinos, gaming equipment and surveillance systems are upgraded continuously. Layout revisions and equipment moves, adds and changes are a way of life...flexible and organized wire management is a top priority. Historically, casinos have used covered trenches in concrete to run the cabling on the gaming floor. These systems are not flexible; minor additions or space revisions result in major costs and disruption.

Gridd provides greater flexibility and an organized grid providing a system to manage and organize the cabling requirements. The ROI advantages of Gridd over time are significant, without the deterioration of concrete slabs, and the inherent inflexibility and costs associated with even minor changes and turnover.

Ease of maintenance for your gaming equipment

Gaming equipment and surveillance systems are upgraded continuously. Simply remove the floor tile, and lift the channel plates; new wires are installed in seconds instead of hours!

High cable capacity

Gridd can handle the cable capacity requirements in casinos! The Gridd floor provides organized channel raceways every 15 inches, providing more than enough room to contain the cabling and other conduits needed to support the wires needed for slot machines, gaming tables and security wiring.

Maximum flexibility with minimum downtime

Renovate your existing casino facility without shutting down your operation. Gridd is ideal for installing in phases, without noise, fumes, dust or debris...no disruption, allowing the rest of the facility to remain 'open for business'. Gridd provides same-day renovation results! Equip your new casino space quickly and efficiently.

Gridd can shorten project timeline and save wire installation costs

Gridd installs in a fraction of the time of trench systems and traditional raised access floors. Gridd brings major electrical and telecom savings to your project...installing wiring and outlets occurs in a fraction of the time of conventional wiring. Channels runs are opened in seconds without tools, cables are laid in place. Gridd eliminates unsightly power poles and the labor to 'daisy-chain' wiring to equipment and machines. Use non-plenum cabling, saving about 1/2 of the telecom material costs.

Gridd can depreciate as equipment in just 7 years

A key financial advantage to Gridd is that can be considered equipment / furniture for tax purposes, and can be depreciated over just 7 years. Slab systems depreciate with the building on a 39 year schedule.

Made in USA

Gridd—every casino deserves this system!

Top organizations like Bally's Technologies, Chances Casino, Cimarron Casino, Commanche Nation Casino, Dancing Eagle Casino and Route 66 Casino (to name a few!) have installed Gridd in varied and critical applications.

FreeAxez has quality representatives in your area who are available to demonstrate the Gridd low profile access floor system at your facility. Feel free to contact FreeAxez at 856-764-0400 to discuss how we might assist your organization in joining the growing family of clients who have made Gridd their wire management solution.
