

Gridd is an ideal adaptive cabling distribution system for the general office environment

Gridd's innovative and revolutionary design incorporates:

- **Lowest Profile** - of any raised access floor available (1.6" or 2.75").
- **High Capacity** - Large cable capacity with organized channels for cable runs.
- **All Steel** - High durability and strength. Double 16 gauge zinc galvanized steel.
- **Efficient Installation** - 1000 square feet per installer per day.
- **Simplicity of Use** - No tools required for access to power, voice and data cabling.
- **Immediate ROI** - Instant payback realized during turnover and re-configurations.
- **Sustainable Design** - GreenSpec listed; 100% recyclable, reusable, refundable.
- **Addition by Subtraction** - Eliminate power poles and exposed cabling.
- **Rapid Depreciation** - as equipment.

### Saves time and money

Floor plans, personnel, equipment, furniture and cabling are undergoing constant changes in the modern office environment. Gridd provides advantages in flexibility, aesthetics, ease of access, organization, sound quality and sustainability. Gridd will save bottom line dollars and pay for itself time and again as your space needs change and grow.

### High cable capacity

The Gridd high capacity channel raceways keep all wiring organized and traceable. Gridd saves operating costs and eliminates the need to run power, voice and data cable through the ceilings and down power poles. It makes it unnecessary to acquire integrated wire management from the systems furniture manufacturer.

### Quick and easy changes

Gridd makes changes simple, without tools! Simply remove the floor tile and lift the channel plates by hand. New wires are installed in seconds instead of hours!

## Great acoustics

Gridd is also acoustically designed to be solid and virtually silent. No one in the office will know they are walking on top of a raised floor!

## Efficient fit-out for existing space and new construction

In renovation projects, Gridd system goes together quickly. Open areas are installed at 1000 sf per installer per day, and adjustable border components fill the gaps quickly without custom work or metal-cutting. Ada-compliant ramp components take up far less valuable space than taller raised floors.

In new construction projects, the slab is suppressed to accommodate the floor—no ramps required and great flexibility from day one! Since Gridd does not attach to the building, your investment is depreciable in only 7 years—further savings!

## Save valuable vertical space

Gridd is the lowest access floor available in the world only 1.6" Or 2.75" High.

## Gridd is a green sustainable low profile access floor

Gridd is the only access floor that is UL-listed, and the only low-profile system listed in the Greenspec Directory of sustainable building products. Gridd provides designers and building owners with Leed points in four categories, and is 100% recyclable.

Made in USA

## Gridd—every office deserves this system!

Top organizations like Bank of America, Johnson & Johnson, Lockheed Martin, Madison-Tyler Holdings, MARS, Inc., and Nuclear Regulatory Agency (to name a few!) have installed Gridd in varied and critical applications.

FreeAxez has quality representatives in your area who are available to demonstrate the Gridd low profile access floor system at your facility. Feel free to contact FreeAxez at 856-764-0400 to discuss how we might assist your organization in joining the growing family of clients who have made Gridd their wire management solution.
