

Gridd is an ideal adaptive cabling distribution system for emergency operations and 911 call centers

Gridd's innovative and revolutionary design incorporates:

- **Lowest Profile** - of any raised access floor available (1.6" or 2.75").
- **High Capacity** - Large cable capacity with organized channels for cable runs.
- **All Steel** - High durability and strength. Double 16 gauge zinc galvanized steel.
- **Efficient Installation** - 1000 square feet per installer per day.
- **Simplicity of Use** - No tools required for access to power, voice and data cabling.
- **Immediate ROI** - Instant payback realized during turnover and re-configurations.
- **Sustainable Design** - GreenSpec listed; 100% recyclable, reusable, refundable.
- **Addition by Subtraction** - Eliminate power poles and exposed cabling.
- **Rapid Depreciation** - as equipment.

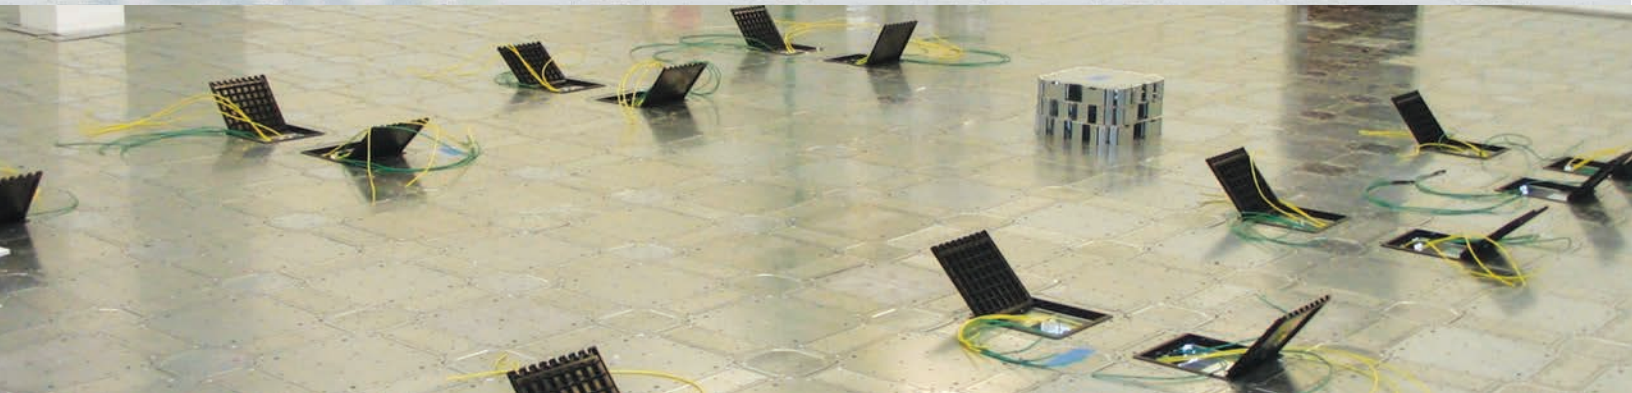

Gridd is the 21st century solution for emergency operations, 911 & secure facilities

Emergency operations centers and 911 police call centers are high technology environments that demand wire management organization and flexibility. Plasma screens, audio/visual equipment, computers, processors, recorders, security check-points, and badge readers all need power and data wiring with constantly changing requirements. Gridd provides a flexible and high capacity solution for console wiring.

Gridd provides adaptability for the EOC environment

Gridd provides greater flexibility and an organized grid system. Modifications to the floor plan and cabling can be made in minutes instead of hours! No tools are required...to change the wiring, simply lift the modular floor covering and open cable channels by hand, new wires are installed in seconds instead of hours!

The ROI advantages of Gridd over time are significant, without the deterioration of concrete slabs, and the inherent inflexibility and costs associated with even minor changes and turnover. The flexibility advantages of Gridd equate to bottom-line savings for the facility.

## Gridd has high capacity for a wire intensive environment

Gridd can handle the cable capacity requirements in emergency management facilities! The Gridd floor provides organized channel raceways 5 " wide, 2 ½" tall every 15 inches, which is more than enough room to contain the cabling and other conduits needed to support the wires needed for consoles, call desks, video conferencing and dispatch operations.

## Maximum flexibility with minimum downtime

The quick-connect Gridd system goes together quickly. Open areas are installed at 1000 SF per day per installer, and adjustable border components fill the gaps quickly custom work or metal-cutting. Renovate your existing center without shutting down your operation. Gridd is ideal for installing in phases, without noise, fumes, dust or debris...no disruption. Gridd provides same-day renovation results!

## Excellent acoustic—a prerequisite for secure facilities

Gridd is ideal for acoustically sensitive applications. Gridd is virtually silent - footfall and sound travel are eliminated by the design of the system. You will not know you are walking on a raised access floor!

## More user-friendly than core drilling and traditional raised floors

Core drilling can be time consuming and not easily adaptable to changes. Traditional raised access floors require more ramping with handrails, and are also time consuming when making even minor changes to the under-floor wiring. Panels are heavy and require special lifting devices. Sound quality can be poor. Gridd offers a revolutionary low profile wire management system that provides organized cable runs, easy access and great acoustics.

Made in USA

## Gridd—every emergency operation room deserves this floor!

Top organizations like Boynton Beach Fire & Rescue, City of Seattle - Homeland Security, Columbiana County EMS, Monroe County Control Center, Rosemont EOC and all branches of the US Military (to name a few!) have installed Gridd in varied and critical applications.

FreeAxez has quality representatives in your area who are available to demonstrate the Gridd low profile access floor system at your facility. Feel free to contact FreeAxez at 856-764-0400 to discuss how we might assist your organization in joining the growing family of clients who have made Gridd their wire management solution.
